Ciao a tutti

Di seguito pochi semplici consigli per la lettura del manga che avete appena scaricato ©

La numerazione delle scansioni è sempre la solita: VOLxx yy, con xx che rappresenta il numero del volumetto (da 01 a 42) e yy il numero della tavola. Ogni tavola (tranne copertine, sommario, e poche altre isolate) è la scansione di 2 pagine in sequenza del fumetto. Queste vanno lette alla giapponese, quindi partendo dalla pagina di destra verso sinistra, e dall'alto verso il basso. Non preoccupatevi, anche chi non c'è avvezzo ci si abituerà molto in fretta! Per il resto basta seguire 1'ordine della numerazione, quindi Volxx 01 → Volxx 02 → Volxx 03 e così via. Ho volutamente allargato un po' l'area di scansione per dare proprio l'idea di star leggendo un volume (si vedono le pagine in rilievo e la tridimensionalità in certi punti), e per essere sicuro che venisse scannerizzato proprio tutto, numeri di pagina e quant'altro. Mi scuso per le immagini che sono venute leggermente "storte", ma il mio vecchio scanner primordiale non sempre ha collaborato, e inoltre non volevo correre il rischio di stiracchiare troppo i preziosi volumetti. Detto questo,

Buona Lettura! 🏻 🖼 🖼
